About

After I delved into what has always been like magic to me and got my first HTML content on screen, I got hooked. I love creating and building things, from physical products to software that solves problems, and I'm open to learning.

Experience

Frontend Developer

2022

CNJP Associates

- Built RiskDemy, a content curation platform for risk management professionals and students, using HTML, CSS, Bootstrap, and JavaScript, to help them learn and relearn risk management concepts and practice.
- Built an MCQ test app (using HTML, CSS, Bootstrap, and JavaScript) to evaluate students' learning on the SQL101 course I tutored.
- Built a Risk Rating Calculator for risk analysis and assessment (using HTML, CSS, Bootstrap, and JavaScript).
- Built a BMI calculator that helps people understand if they're within a healthy weight or not.
- Initiated and implemented web design and development projects for clients.

Portfolio Reporting Manager

2021

Keystone Bank Limited

Responsible for extracting, cleaning, and analyzing the Bank's credit portfolio to determine the quality of risk assets along IFRS-9 staging classification, helping relationship officers and Management to quickly recognize top obligors, performing and non-performing loans across regions, products, etc.

Operational Risk Data Analyst

2019 - 2020

FCMB Limited

Increased resolution of risks and issues by 20% via data visualisations developed to highlight and monitor loss events and key risks across 206 branches/business units. Managed the collection, cleaning, and analysis of risk data across 206 locations and business units. Analyzed the inputs to extract insights, trends and patterns resulting in action plans that addressed the risks faced by the Bank.

Education

Data Analytics Professional Certificate

2022

Google Career Certificates

Learnt key analytical skills (data cleaning, analysis, & visualisation) and tools (Spreadsheets, SQL, Tableau, and R) to help solve business problems by drawing out powerful insights, trends and patterns; and champion data-driven decision-making.

Master of Business Administration

2012 - 2013

University of Sunderland

Learnt about all areas of managing a business, studying everything from global corporate strategy to the international business environment.

BSc. Accounting

2005 - 2009

Madonna University

Got schooled in the language of business - accounting.
